

LIP Internship Program 2022

information for the week and beyond

Sofia Andringa for the many people involved

LABORATÓRIO DE INSTRUMENTAÇÃO
E FÍSICA EXPERIMENTAL DE PARTÍCULAS

since 2017

last two editions (mostly) online: welcome back!

the agenda this week

Two or three lectures each morning,
covering most of the subjects of your projects

Tutorial chats just before lunch,
ask all the questions you want!,
interact with LIP researchers & students

Hands-on tutorials in the afternoons,
learn useful tools for your projects & beyond

(some in parallel: you need to choose)

lectures & tutorials
also by zoom,
also recorded,
but...

the center & surroundings

Your project

this is clearly the main focus for all!

Your supervisor, colleagues, group

your supervisor is your main contact
has everyone already met?

The LIP community

colleagues are spread around in location
but we stay connected to the rest of LIP

email or slack

Sofia @ lip.pt

Rute @ lip.pt

Raul @ lip.pt

Alex @ coimbra.lip.pt

Helpdesk @ lip.pt

the agenda further on

Mid-term activities

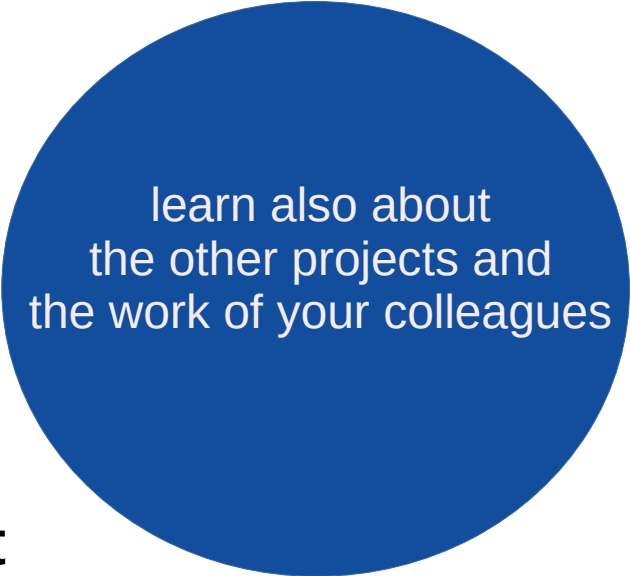

not centrally planned this year
but you're welcome to propose!

Final workshop in September 8th and 9th

one talk from each project, mark the date!
more details will be given further on

Final papers also expected for each project

check out previous ones in the LIP webpage

learn also about
the other projects and
the work of your colleagues
