

LIP Internship Program 2022

Final Workshop

Braga, Coimbra, Lisboa

September 8th, 9th

Sofia Andringa (on behalf of the organizers)

Thank you all for taking part!

Mostly to you, the students, for spending the summer working on research and sharing it with us;

To supervisors for preparing and following the research projects;

And to everyone contributing at LIP,

the ECO, IT, directorate and secretariat teams,

Nuno Leonardo who set up the program years ago,

Alexandre, Raul, Rute and Gernot for organizing of this year's introductory week and final workshop

**Do you want to do Physics
in an International project?**

Join us this summer!

• Cosmic Rays, Neutrinos and Dark Matter • Detectors,
Instrumentation and Computing • Physics at the LHC • Structure
of Matter and Heavy Ions

Research internships for Physics and
Engineering students
from July 11th to September 9th

Registration open from
April 26th to May 27th, 2022

the final survey

It was a busy Summer, we hope you enjoyed it!

All comments and suggestions will be helpful,

please fill a final survey in:

<https://forms.gle/aFRiXTALQ8N7cUYk6>

the final paper

You are encouraged to also write a research paper on your project

suggested length is 5 pages, no more than 10

use the overleaf template, following the instruction by email

share with colleagues and supervisors with time

please submit by email to training@lip.pt by October 10th

After approval the papers will be hosted on the LIP website

the final workshop

This 2-day workshop will cover most of the subjects we work on!

It is a time for you to share your work,

but also to learn from the others:

do ask questions to your colleagues!

please send your slides before your sessions and then try to stay on time

the final workshop

Let's start!

Photo during the workshop!
