

INCD status report

Friday, 29 September 2023 09:50 (20 minutes)

INCD (www.incd.pt) provides computing and data services to the Portuguese national scientific and academic community in all areas of knowledge. The infrastructure is especially oriented to provide scientific computing and data oriented services, supporting researchers and their participation in national and international projects.

INCD operates an integrated infrastructure with services being provided from multiple geographic locations, interconnected by a state-of-the-art data network. The INCD services are integrated in international infrastructures with which it shares computing resources for the benefit of projects of national and international relevance. In this context, INCD participates in the European Grid Infrastructure (EGI), Iberian computing infrastructure (IBERGRID), the Worldwide LHC Computing Grid (WLCG), and the European Open Science Cloud and Portuguese advanced Computing Network (RNCA).

This presentation will provide an overview of the INCD infrastructure current status and expected developments.
