Cybersecurity Services to Unique Science and Technology Infrastructures (ICTS)

Wednesday, 27 September 2023 10:00 (30 minutes)

RedIRIS, in collaboration with the CCN, provides cybersecurity services to Unique Scientific and Technical Infrastructures (ICTS) that depend on the Ministry of Science and Innovation in Spain. These services are focused on the prevention of security incidents and active defense. The key of these services is facilitate the complete process of adaptation to the ENS (adaptation, implementation, audit and certification) of the ICTSs. Additionally, other cybersecurity services are provided to help the organization in the prevention and defense against security incidents.
