Contribution ID: 1

Type: **Presentation (13' + 2' for questions)**

INCD status report

Wednesday, 30 October 2024 12:45 (15 minutes)

INCD (www.incd.pt) provides computing and data services to the Portuguese scientific and academic community for research and innovation in all domains. The infrastructure is oriented to provide scientific computing and data oriented services, supporting researchers and their participation in national and international projects.

INCD operates an integrated infrastructure with services being provided from several geographic locations, interconnected by a state-of-the-art data network. The INCD services are integrated in international infrastructures with which it shares computing resources for the benefit of projects of national and international relevance. In this context, INCD participates in the European Grid Infrastructure (EGI), Iberian computing infrastructure (IBERGRID), the Worldwide LHC Computing Grid (WLCG), and the European Open Science Cloud and Portuguese advanced Computing Network (RNCA).

This presentation will provide an overview of the INCD infrastructure current status and evolution.
