EGI Software Provisioning Infrastructure

Tuesday, 29 October 2024 15:20 (20 minutes)

This presentation provides an overview of the architecture and implementation of the new artefacts repositories for EGI.

The EGI repositories are developed, maintained and operated by LIP and IFCA/CSIC. The new repositories will host RPMs for (RHEL and compatible distributions), DEBs (for Ubuntu and compatible distributions) and Docker images for container-based services and micro-services.

The presentation will describe the architecture of the new repositories and their components and capabilities.
