Mastering the SQAaaS platform: a Software Quality Assurance as a Service tutorial

Monday, 28 October 2024 10:30 (1 hour)

The Software Quality as a Service (SQAaaS) platform allows the researcher to evaluate the quality characteristics of their source code, web services and the FAIR maturity level of scientific data. This platform exposes different interfaces ranging from a graphical web portal to APIs, libraries and integrations with code hosting platforms. In this tutorial we will dive into the current features of the platform and demonstrate its usage through a series of use cases.

Primary authors: ORVIZ FERNÁNDEZ, Pablo (IFCA-CSIC); BERNARDO, Samuel (LIP)

Presenters: ORVIZ FERNÁNDEZ, Pablo (IFCA-CSIC); BERNARDO, Samuel (LIP)

Session Classification: Tutorials and demonstrations

Track Classification: Quality of software, services and data
