Communication & Outreach report

- since the mini-jornadas of April 2015 -

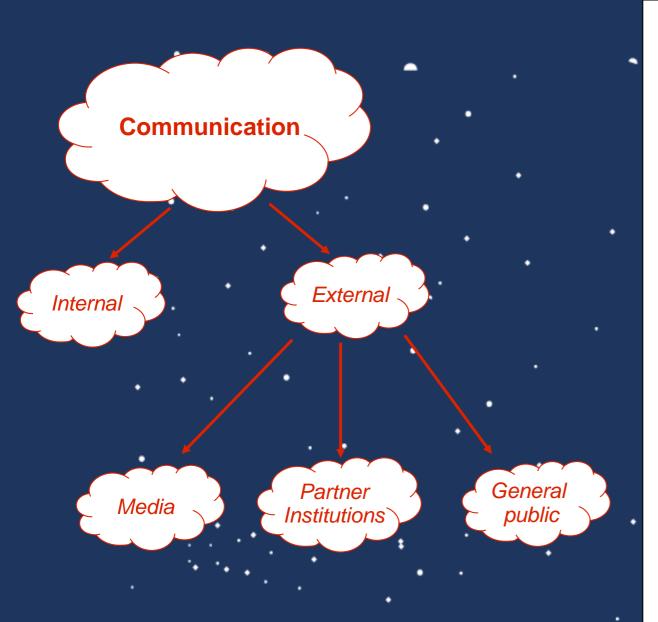

Catarina Espírito Santo and Pedro Abreu for the LIP Outreach Team

Introduction

The LIP Comm & Outreach team cares about communication and science outreach

- Includes researchers from the different LIP teams at different fractions of their time
- Has its own activity lines, that go beyond the specific projects
- Is a member of international outreach groups, namely IPPOG and EPPCN
- Collaborates with CERN, Ciência Viva and PT Universities and research centers

Today's topics:

- LIP annual reports
- LIP-News Bulletin
- Media: press-releases & prizes
- New web site
- Conference presentations
- LIP Anniversary → Exhibition

Proposta para novo formato de Relatórios do LIP

Catarina Espírito-Santo Carlos Manuel Helmut Wolters Ricardo Gonçalo

LIP annual report

New format proposed to the CC in December:

- **1.** A public report, which is the visiting card of the institution (PT+EN)
- 2. A technical report, for the Advisory board and LIP associates (EN)

ONTENTS

ABOUT

Introducing LIP

Director's Report

Report from the International Advisory Board

News and Events

Structure and governance

PEOPLE

Principal Investigators / Group Leaders Researchers

Post doctoral researchers

Administrative and technical staff

Students

Associate and honorary researchers

RESEARCH

Experimental particle and astroparticle physics

- · LHC experiments and phenomenology
- Structure of matter physics
- Cosmic ray physics
- Dark matter and neutrinos physics

Development of new instruments and methods

- LHC experiments and phenomenology
- Structure of matter physics

Advanced Computing

Research Facilities

- Detectors Laboratory
- Electronics Laboratory
- Mechanical Precision Workshop

SCIENCE AND SOCIETY

Advanced training

- PhD@LIP
- PriD@LIP
 Doctoral programmes

Doctoral programmes

Technology transfer, industry and spin-offs

- Spin-off technologies for cancer diagnostics at TagusLIP laboratory
- RPC production in the Brazilian industry

LIP and the Portuguese industry and CERN

Education, outreach and engagement

- Overview
- CERN teacher's school in Portuguese language
- International Masterclasses in Particle Physics
- Radiation environment project

PERFORMANCE

Responsibilities and recognition Key performance indicators Financial report

FUTURE PLANS

SCIENTIFIC OUTPUT

Refereed journal articles Refereed conference proceedings

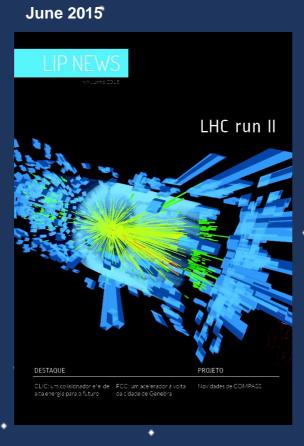

CONFERENCES AND EVENTS

Conference presentations LIP-organised conferences, workshops and seminars

ANNEXES

List of terms and abbreviations

LIP News Bulletin

- Periodic
- Themes & discussions
- Different audiences

Feb 2016

Conceição Abreu and Carlos Manuel

Português [change] Lo

Media

- Spread CERN press releases (EPPCN)
- Translate,Add national angle + contacts
- Produce LIP press releases
- Foster contacts with journalists

Investigadores do LIP partilham prémio

"pela descoberta da oscilação de neutrinos que demonstra que os neutrinos têm massa"

2015 NOBEL PRIZE IN PHYSICS

Takaaki Kajita, Arthur B. McDonald

"for the discovery of neutrino oscillations, which shows that neutrinos have mass

The year of the **Neutrinos**

participação portuguesa

A+ / A-

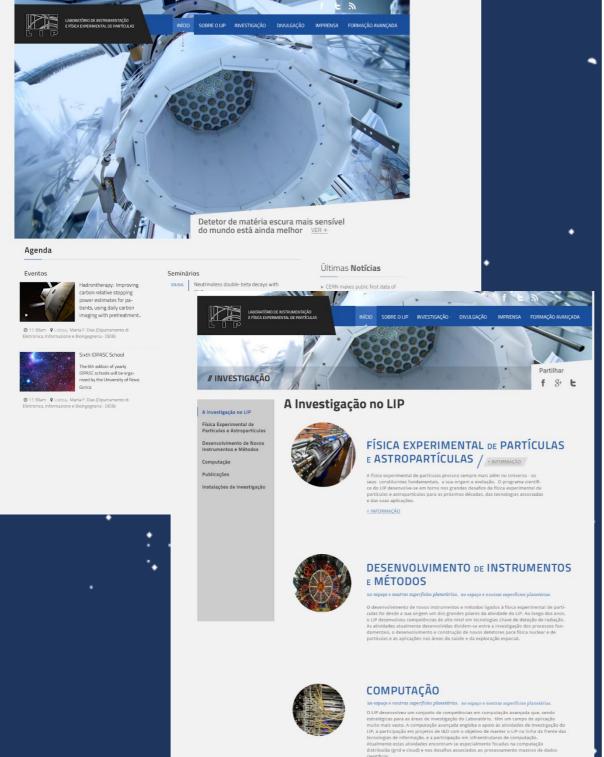

06 Out. 2015 - 13:57 · Cristina Nascimento

O cientista José Maneira trabalhou directamente com um dos agora laureados com o Nobel e abriu em Portugal um grupo de trabalho sobre neutrinos que ajudou ao desenvolvimento do trabalho agora premiado.

José Maneira no laboratório SNOLAB, no Canadá.

O prémio Nobel da Física atribuído ao canadiano Arthur McDonald e ao japonês Takaaki Kajita pelas suas descobertas na oscilação de neutrinos tem participação portuguesa. Desde 2005, o Laboratório de Instrumentação e Física Experimental de Partículas participa na experiência SNO, conduzida por McDonald, na Universidade de Queen's, no Canadá.

+ INFORMAÇÃO

New LIP web site

- Ready for LIP's anniversary
- Part of a general revision of the lab's image presentation instruments

PART CULAS

30 anos LIP

do bosão de Higgs à matéria escura

Universidade de Coimbra Colégio de Jesus, Museu da Ciência 05-23 Abril 2016

Universidade de Lisboa Átrio da Reitoria, Cidade Universitária 02-25 Maio 2016

www.lip.pt/particulas

Thank you to all who contribute with contents and revisions!

Special thanks to the assembly team:

Pedro Abreu, Sofia Andringa, Juan Pedro Araque, Alberto Blanco, Nuno Castro, Orlando Cunha, Catarina Esp Santo, Hugo Gomes, Ricardo Gonçalo, Luís Lopes, José Carlos Nogueira, João Pequenão, Vladimir Solovov

Exhibition.

PARTCULAS

do bosão de Higgs à matéria escura

Universidade do Minho Átrio CP2, Campus de Gualtar, Braga 17 Fev - 09 Mar 2016

Universidade de Coimbra Colégio de Jesus, Museu da Ciência

05-23 Abril 2016

Universidade de Lisboa Átrio da Reitoria, Cidade Universitária 02-25 Maio 2016

www.lip.pt/particulas

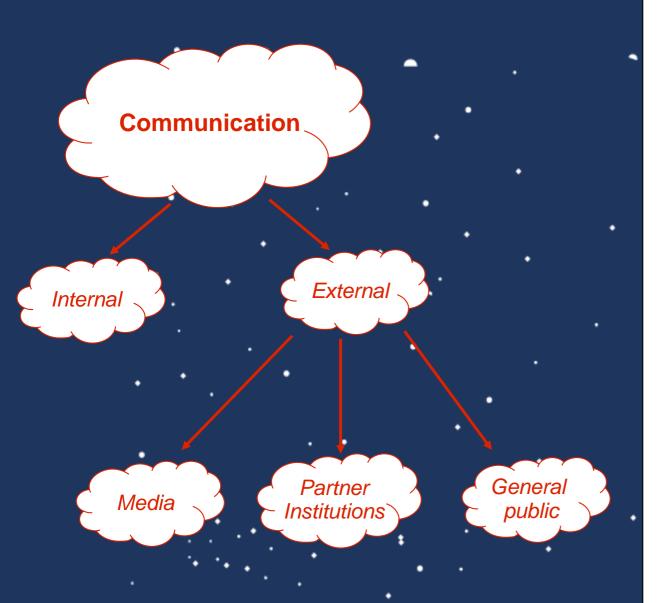

Braga totally under control

Thank you to the local team for taking care of the organization, dissemination, and for the recruitment of an impressive team of guides

... We'll need to do this in Coimbra and Lisboa!

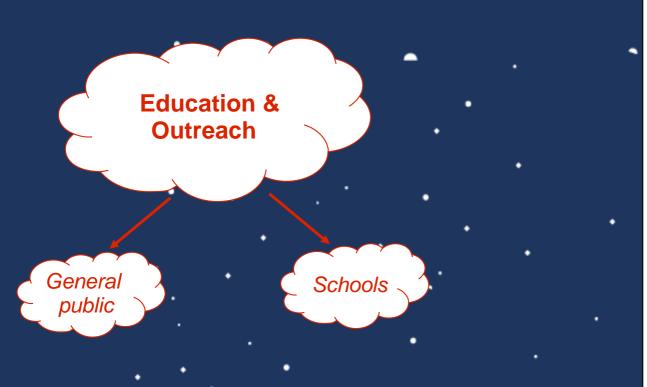

Some goals:

+ Increase visibility of the Lab for students
for our partners

- + Improve internal communication
- + Increase participation

. . .

Today's topics:

- CERN school for teachers in PT
- Seminars and public sessions
- Masterclasses
- LabLEDs Project
- "Science in the Summer" programme

Portuguese language programme for teachers

National until 2008 International since 2009

2015 was a low budget year.

Teachers:
24 from Portugal
22 from Brazil
6 from the PALOPs

Today, a wide network of teachers and schools

Increased the participation in Masterclasses, requests for Seminars, visits to CERN, ...

Always present, the PT CERN guides: A. David, J.C. Silva, J. Oliveira, J. Bento, R. Gonçalo, J. Miguéns, ...

IPPOG Masterclasses

12th Edition just started!

14 locations all over the country, Funchal for the first time

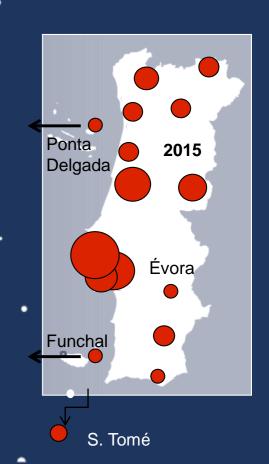

Support from all LIP researchers and students

Volunteers needed!

Particularly on the 5th and 19th of March in Lisbon

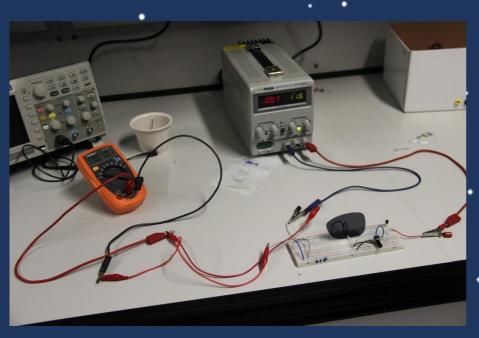

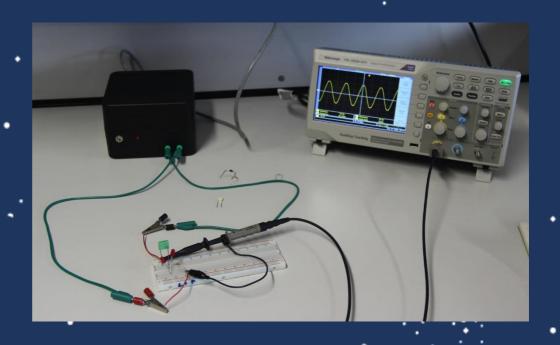

Projecto LabLEDs

Luis Peralta, Florbela Rego, Sandra Soares, Pedro G. Almeida Conceição Abreu

- Started in 2015
- 15 participant schools
- Goal: explore the use of LEDs in different Physics experiments

Topics in 2015-2016:

-LEDs in lightning

Infrared LEDs and sensors

- Measuring the atenuation of light in coloured lenses
- Measuring the UV index using a photosensor and Arduino

2 teacher training actions in October 2015

Meeting of participant students in May 2016

Proposals for the Science in the Summer activities

"Science in the Summer" Ciência Viva Programme

2 weeks @ LIP

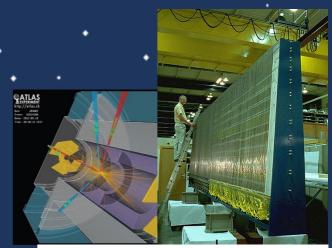

18 students in 2015

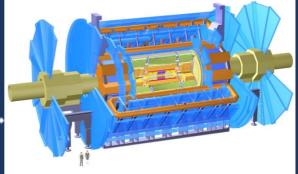

- Explore the Auger public data set
- ATLAS Light, fibers, scintillators + real event analysis
- "Hunting for particles"

Activites in the labs at FCUL and IST

Support

Pedro Abreu, Sofia Andringa, Fernando Barão, Catarina Espírito Santo, Agostinho Gomes, Luis Gurriana, Ana Sofia Nunes, Luis Peralta

MANY seminars and public sessions

Just one example:

July 2015, Cycle "Noites de ciência, noites de luz"

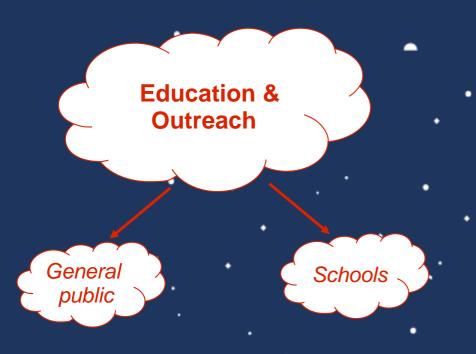

Agostinho Gomes e João Gentil

Demonstration: Cloud chambers to detect cosmis rays

"Na palestra deste mês fala-se de luz, mas a deteção de partículas é outro aspeto fundamental da astrofísica. Assim, serão utilizadas pequenas câmaras de nevoeiro (de Wilson) para observar partículas dos raios cósmicos que penetram na atmosfera terrestre. As partículas com carga eléctrica ao atravessarem as câmaras deixam traços à sua passagem, que podem ser observadas visualmente. Siga as explicações ao vivo!"

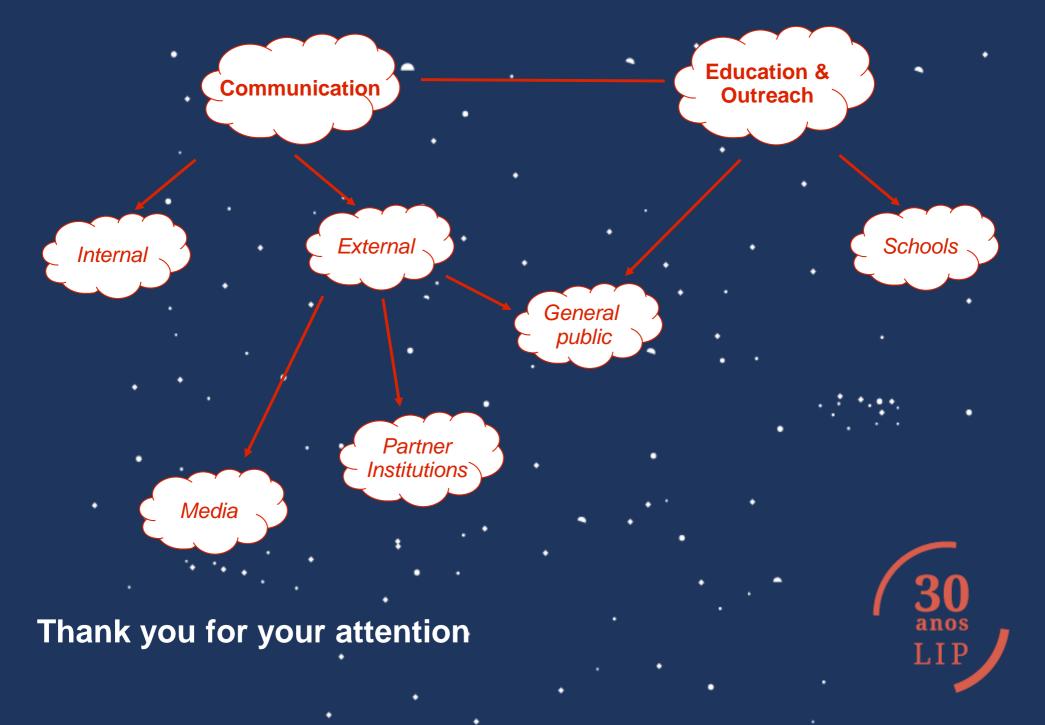

A set of consolidated activities and networks...

And some goals:

- > Development of educational contents: (Activity guides, small exhibitions, ...)
- > Increase publications in science education journals
- > Build demonstration and experimental Kits
- > Foster participation

LIP spark chamber: now in Portugal (3), Argentina (1), Italy (1), Spain (1), Austria (2), Brazil (1), CERN (1)

... Comm & Outreach needs you!
