

Jornadas do LIP 2016

Friday, 19 February 2016

Experimental Particle Physics with Accelerators - LHC: CMS (15:00 - 15:50)

time	[id] title	presenter
15:00	[2] Prospects for gamma-gamma exclusive production with CT-PPS	HOLLAR, Jonathan
15:10	[3] b physics measurements	LEONARDO, Nuno
15:20	[4] Searches for stop and stau production	BARGASSA, Pedrame
15:30	[5] Searches for charged Higgs production	VISCHIA, Pietro
15:40	[6] WW cross-section measurement and missing ET	LORET, Lara

Experimental Particle Physics with Accelerators - LHC: ATLAS (15:50 - 16:40)

time	[id] title	presenter
15:50	[15] Introduction and group presentation	CONDE MUIÑO, Patricia
15:55	[16] FCNC in top quark decays	GALHARDO, Bruno
16:01	[17] Search for vector-like quarks	ARAQUE, Juanpe
16:07	[18] Global Sequential Calibration for the ZH (H->bb) search	SOUSA, Mário
16:13	[19] WH->l nu bb searches using a BDT	PEDRO, Rute
16:19	[20] DCS of TileCal and Forward Detectors	SEABRA, Luís
16:25	[21] Jet trigger algorithms with GPUs for the ATLAS Upgrade	DELGADO, Ademar

Experimental Particle Physics with Accelerators - LHC: LHC Phenomenology (17:10 - 17:30)

time	[id] title	presenter
17:10	[9] Phenomenology at the LHC	ONOFRE, António

Experimental Particle Physics with Accelerators - LHC: Experimental Particle Physics with Accelerators - LHC (17:30 - 17:50)

time	[id] title	presenter
17:30	[10] Overview & Prospects for the Research Line
