# Competence center for Simulation and Big Data

- Aims to gather and expand LIP's competences on these areas
  - achieve critical mass
  - train students and researchers
  - explore the synergies between different LIP groups
  - provide services and consulting inside and outside LIP
- This effort has started ~1 year ago
  - establishing communication channels and discussion forums
  - survey of the LIP competences on these areas
  - planning of the future

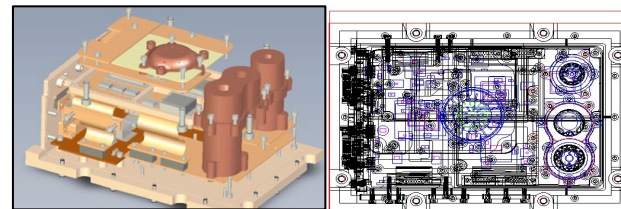

# Simulation

- coordination: Bernardo Tomé and Patrícia Gonçalves
- mailing list: [geant4@lip.pt](mailto:geant4@lip.pt)
- GEANT4 has long been used in LIP: from biomedical applications to detector performance studies or space radiation effects
  - critical activity for different LIP groups
- LIP is a member of the GEANT4 collaboration for more than 10 years, accumulating an important expertise, both from the user and developer points of view;

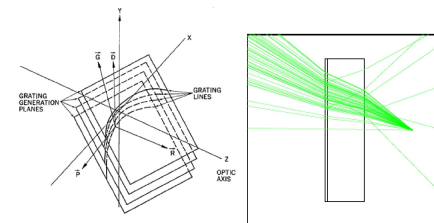

# Simulation

## Survey of competences

GUIMesh – CAD to GDML conversion

- A survey of the GEANT4 competences at LIP was undertaken
- Know-how beyond applications development
- Expertise in several GEANT4 kernel categories
- LIP members are teaching courses with some emphasis in GEANT4 (MSc and PhD @ Lisboa and Coimbra Universities)

Simulation of diffraction gratings

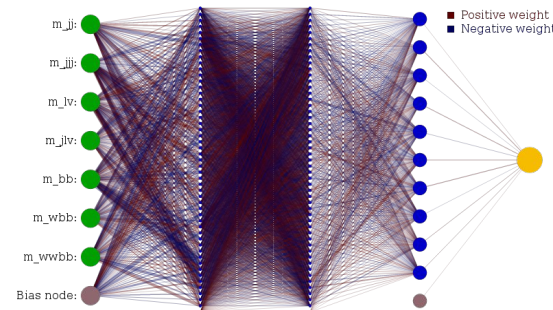

# Simulation

## Next steps

- Coordinate the existing expertise in order to foster the interaction with the community
- LIP GEANT4 workshop/school/tutorial towards summer... to be better defined
- Possible participation at *Física 2018*
- Identify the potential and strategy(ies) to create links with the *outside world*
- Increase our contribution to (and visibility within) the GEANT4 collaboration

# Big Data

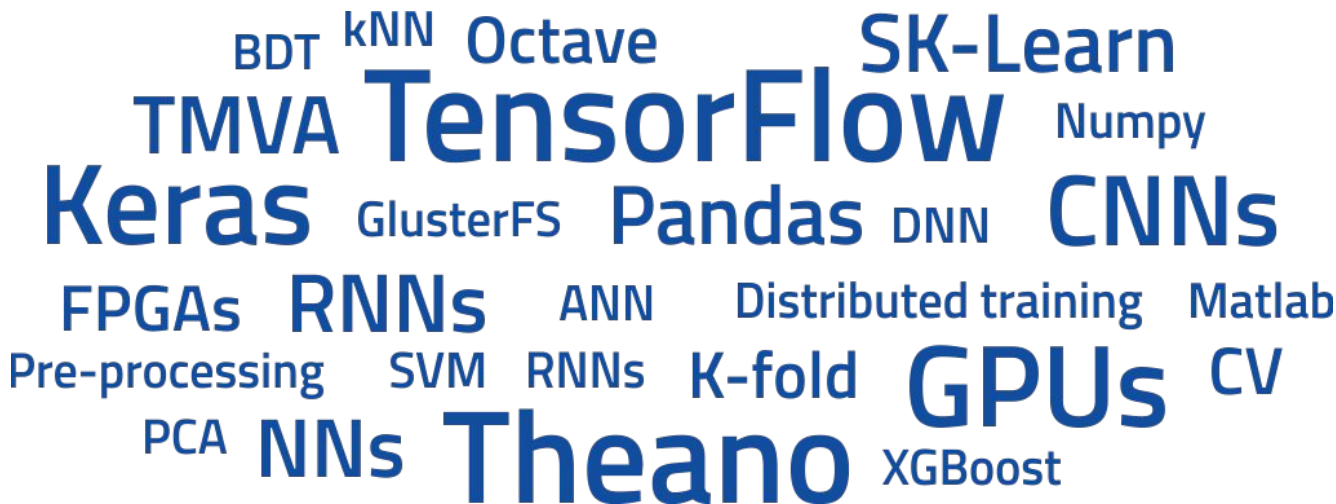

- coordination: Nuno Castro and Guilherme Milhano
- mailing list: [big-data@lip.pt](mailto:big-data@lip.pt)
- LIP has been involved in the analysis of extremely large amounts of data produced by different experiments in HEP, for a long time
- Expertise on the implementation and development of elaborate multivariate techniques aiming at a vast range of applications
- Competence in efficient data processing to better use the available computing resources

# Big Data and machine learning

## Tools and interests of the team

- Survey to understand what we know (or would like to know)

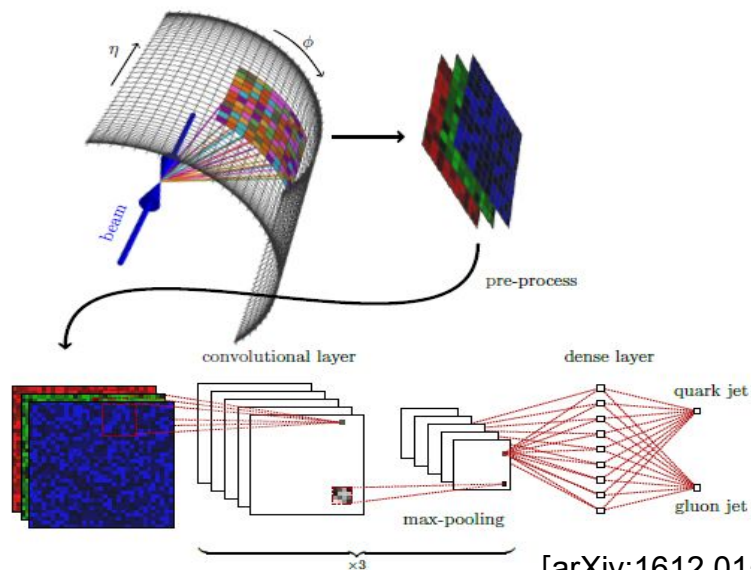

A word cloud of machine learning and data science tools and concepts. The words are arranged in a roughly rectangular shape, with 'TensorFlow' and 'Theano' being the largest and most prominent. Other large words include 'Keras', 'CNNs', 'GPUs', 'Pandas', 'DNN', 'RNNs', 'ANN', 'SVM', 'K-fold', 'PCA', 'NNs', 'XGBoost', 'Matlab', 'Distributed training', 'Pre-processing', 'FPGAs', 'TMVA', 'BDT', 'kNN', 'Octave', 'SK-Learn', 'Numpy', 'GlusterFS', 'CV', and 'PCA'.

BDT kNN Octave SK-Learn  
TMVA TensorFlow Numpy  
Keras GlusterFS Pandas DNN CNNs  
FPGAs RNNs ANN Distributed training Matlab  
Pre-processing SVM RNNs K-fold GPUs CV  
PCA NNs Theano XGBoost

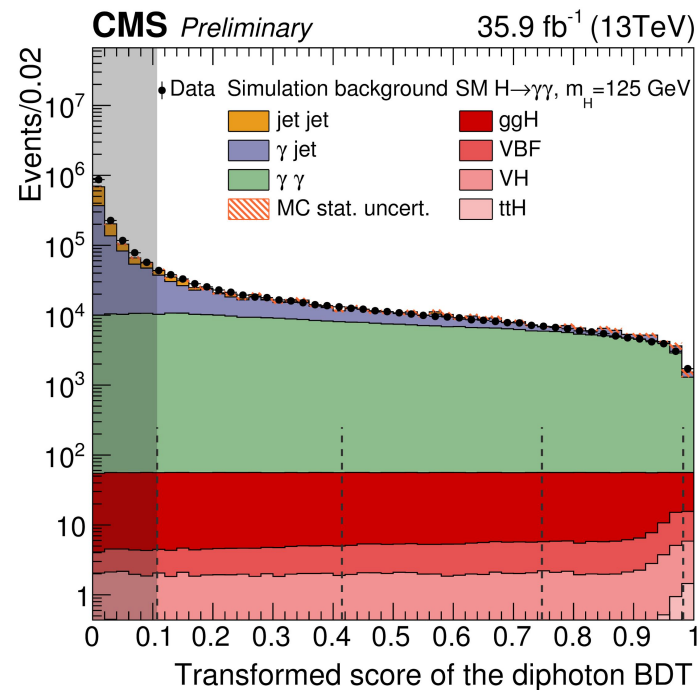

# Big Data - machine learning

## Regular informal meetings

- Emphasis on the journal club style:
  - discussion on new techniques:

[arXiv:1612.01551]

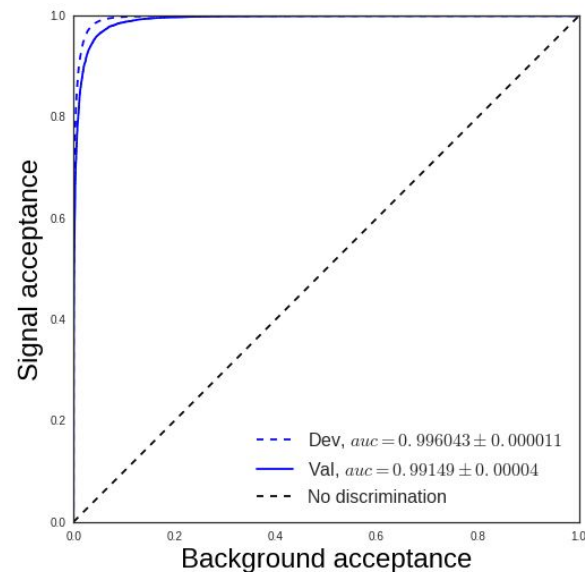

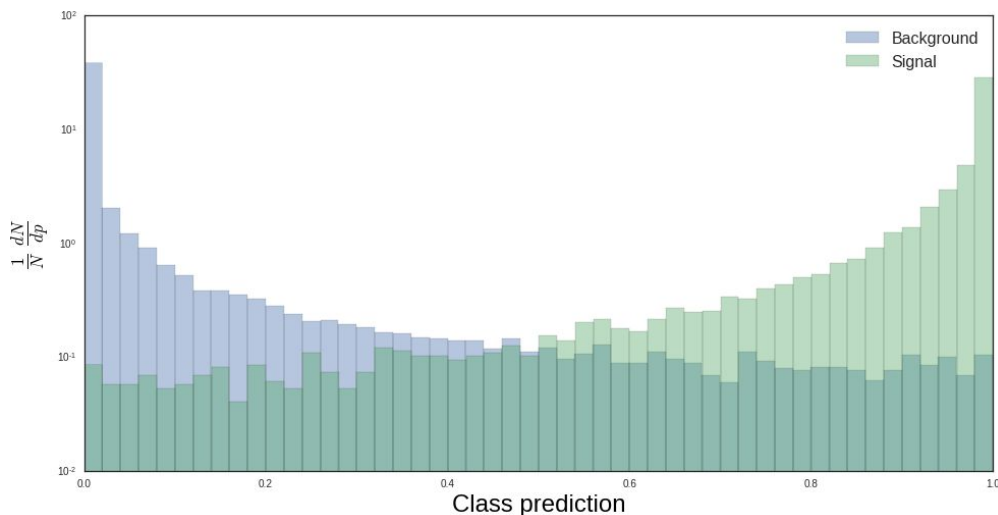

[<https://cds.cern.ch/record/2264515>]

# Big Data - machine learning

## Regular informal meetings

- Emphasis on the journal club style:
  - Keras tutorial by Giles Strong

# Big Data - machine learning

## Regular informal meetings

- Emphasis on the journal club style:
  - Docker and udocker tutorial by Mário David

```
$ git clone git@github.com:LIP-Computing/bigdata_tutorial.git
$ cd bigdata_tutorial/
$ mkdir dockerfiles
```

```
$ git add dockerfiles/docker-keras-theano
```

```
$ git status
```

```
On branch master
Your branch is up-to-date with 'origin/master'.
Changes to be committed:
  (use "git reset HEAD <file>..." to unstage)

    new file:   dockerfiles/docker-keras-theano
```

```
$ git commit -m 'add dockerfile'
```

```
[master 454cc81] add dockerfile
 1 file changed, 25 insertions(+)
 create mode 100644 dockerfiles/docker-keras-theano
```

```
$ git push
```

```
X11 forwarding request failed on channel 0
Counting objects: 4, done.
Delta compression using up to 6 threads.
Compressing objects: 100% (3/3), done.
Writing objects: 100% (4/4), 696 bytes | 0 bytes/s, done.

# Big Data - machine learning

## Computational resources

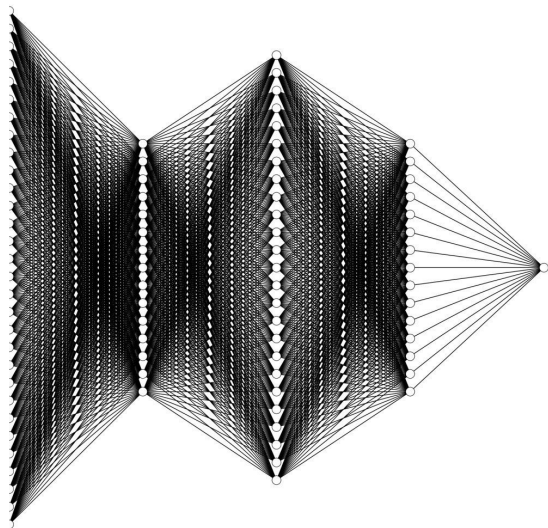

- It is important to ensure computing resources (hardware and software)
  - flexibility
  - training
- GPU grant from NVIDIA:
  - a Titan XP board was donated
  - a dedicated server is being prepared and will become available soon
    - contact us ([hcarvalho@lip.pt](mailto:hcarvalho@lip.pt)) if you want an account

# Big Data - machine learning

## Computational resources

- Access to accelerator devices (e.g. CPUs) is critical for the training of complex (deep) neural networks

```
1 # set the matplotlib backend so figures can be saved in the background
2 # (uncomment the lines below if you are using a headless server)
3 # import matplotlib
4 # matplotlib.use("Agg")
5
6 # import the necessary packages
7 from pyimagesearch.minigooglenet import MiniGoogLeNet
8 from sklearn.preprocessing import LabelBinarizer
9 from keras.preprocessing.image import ImageDataGenerator
10 from keras.callbacks import LearningRateScheduler
11 from keras.utils.training_utils import import multi_gpu_model
12 from keras.optimizers import SGD
13 from keras.datasets import cifar10
14 import matplotlib.pyplot as plt
15 import tensorflow as tf
16 import numpy as np
17 import argparse
```

# SCHOOL & SYMPOSIUM

registration open

[www.lip.pt/data-science-2018](http://www.lip.pt/data-science-2018)

Lisboa, PORTUGAL  
12-16 MARCH

## Organizing Committee:

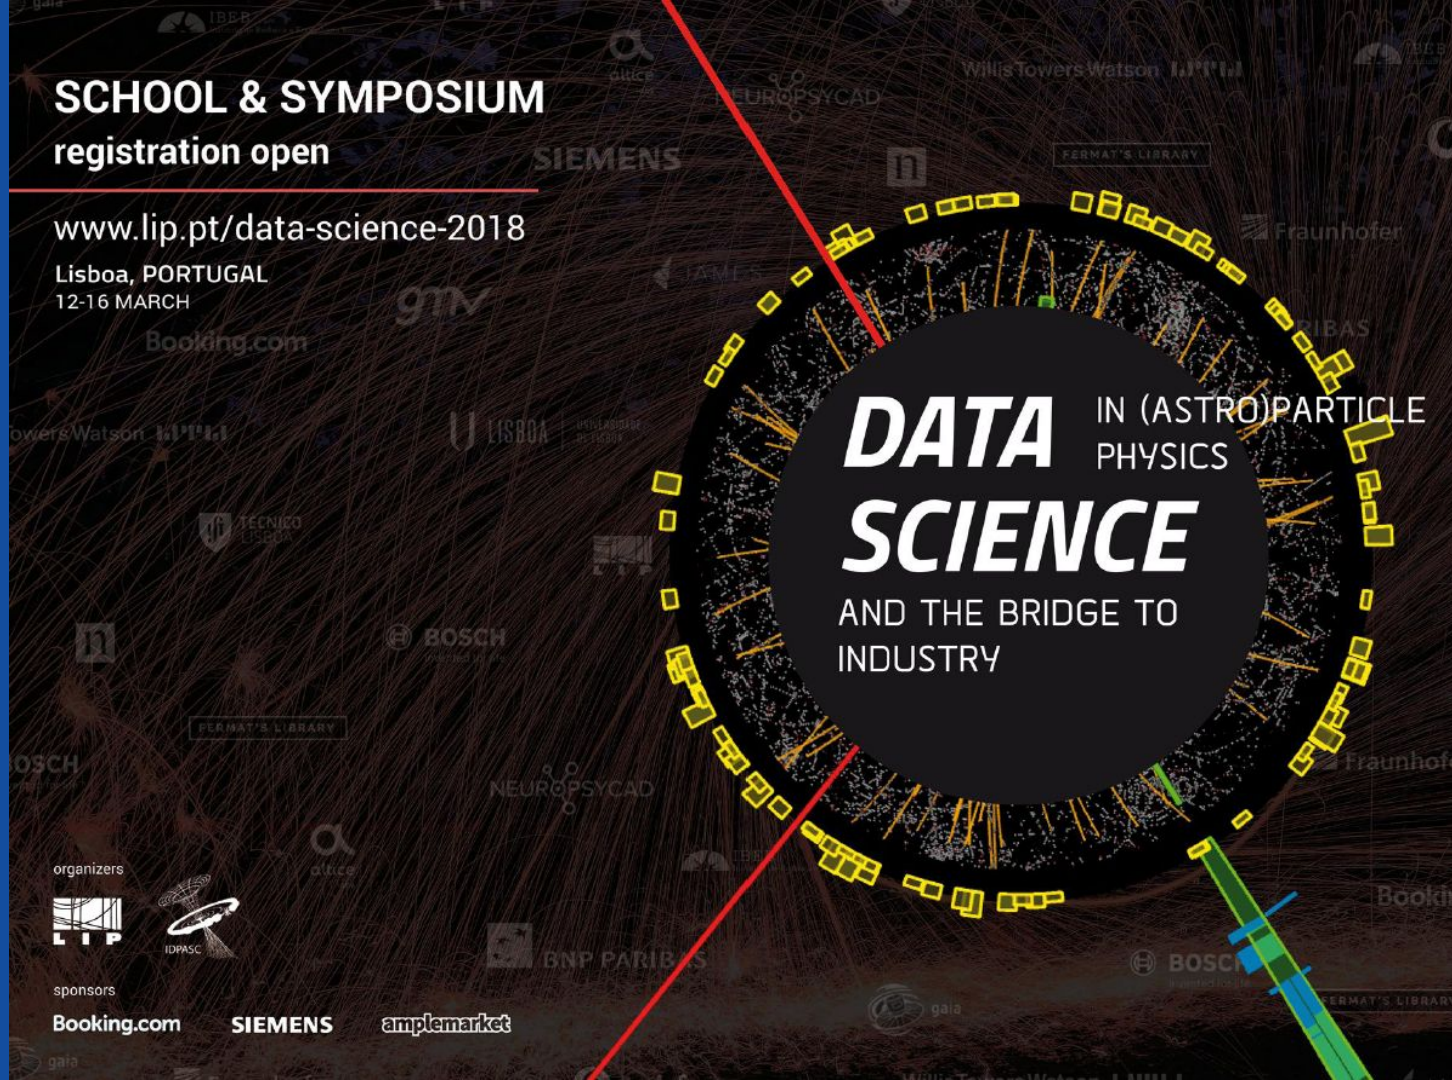

Bernardo Tomé (co-chair)  
Catarina Espírito Santo  
Daniel Galaviz  
Guilherme Milhano  
Lorenzo Cazon (chair)  
Mário Pimenta  
Nuno Castro  
Ricardo Gonçalves  
Ruben Conceição (co-chair)

## Design and Development:

Carlos Manuel

## Secretariat:

Natália Antunes

## Work is ongoing...

- The competence center has started its activities
- Strategic to LIP
  - Training
  - Synergies
  - Funding
- **We need you!**

# JORNADAS CIENTÍFICAS

The logo for LIP (Laboratório de Informática e Processamento de Dados) is located to the right of the word "CIENTÍFICAS". It consists of a square containing a stylized grid of lines, with the letters "LIP" positioned below the square.
