Exclusive and Inclusive photoproduction of XYZ

Wednesday 8 September 2021 14:50 (20 minutes)

I'll present estimations of cross sections for the electro- and photoproduction of several exotic candidates, including $X(3872)$, $Y(4260)$ and $Z_c(3900)^+$ based on the publication 10.1103/PhysRevD.102.114010. I also present preliminary results of the inclusive photoproduction of these exotic meson candidates.
