Light meson spectroscopy at BESIII

Sunday 5 September 2021 13:00 (20 minutes)

Due to the high production of light mesons J/ψ radiative and hadronic decays, the largest sample of J/ψ events accumulated at the BESIII detector offers a unique laboratory to study the light mesons spectroscopy and search for the light exotic states. In this talk, we shall report the recent progresses on the light meson spectroscopy achieved at BESIII.

Primary author: HAN, Tingting (山东大学)

Presenter: HAN, Tingting (山东大学)

Session Classification: Hadron spectroscopy and exotics

Track Classification: Hadron spectroscopy and exotics
