

# New Physics searches at LHC: Looking forward and beyond opportunities with the CMS group

Michele Gallinaro  
[michgall@cern.ch](mailto:michgall@cern.ch)

# ...in a challenging environment

CMS Experiment at LHC, CERN  
Data recorded: Fri Oct 26 09:06:57 2018 CEST  
Run/Event: 325309 / 244518  
Lumi section: 1  
Orbit/Crossing: 121529 / 1650

136 vertices !

# Higgs candidate event

$\mu^+(Z_1) p_T : 43 \text{ GeV}$

**8 TeV DATA**

**4-lepton Mass : 126.9 GeV**

$\mu^-(Z_1) p_T : 24 \text{ GeV}$

$e^-(Z_2) p_T : 10 \text{ GeV}$

$e^+(Z_2) p_T : 21 \text{ GeV}$

CMS Experiment at LHC, CERN  
Data recorded: Mon May 28 01:35:47 2012 CEST  
Run/Event: 195099 / 137440354  
Lumi section: 115

# Top quarks and tau leptons

arXiv:1911.13204

A. Toldaiev

- Lepton flavor anomaly: 3 experiments measure small deviation from SM expectations

- Study tau leptons in top quark decays
- Measure cross section, study event kinematics
- Lepton flavor universality in top quark events

$W^+$ DECAY MODES	Fraction ( $\Gamma_i/\Gamma$ )	Confidence level	$\rho$ (MeV/c)
$\ell^+\nu$	[b] $(10.86 \pm 0.09) \%$		–
$e^+\nu$	$(10.71 \pm 0.16) \%$		40192
$\mu^+\nu$	$(10.63 \pm 0.15) \%$		40192
$\tau^+\nu$	$(11.38 \pm 0.21) \%$		40173

$$R_{\ell\tau_h/\ell\ell} = 0.973 \pm 0.009 \text{ (stat)} \pm 0.066 \text{ (syst)}$$

# Dark matter and energy

- What is that accounts for 96% of the Universe?  
Nobody knows.
- It is one of the greatest mysteries of Science

# Higgs + Dark Matter

arXiv:1908.01713

J. Goncalves et al.

- DM search with  $H(\rightarrow ZZ)$
- Generic search:  $pp \rightarrow X + \text{MET}$
- Model independent search
  - Signature:  $h(\rightarrow ZZ/bb/\gamma\gamma) + \text{MET}$

- Signal events at large MET

# Double Higgs production

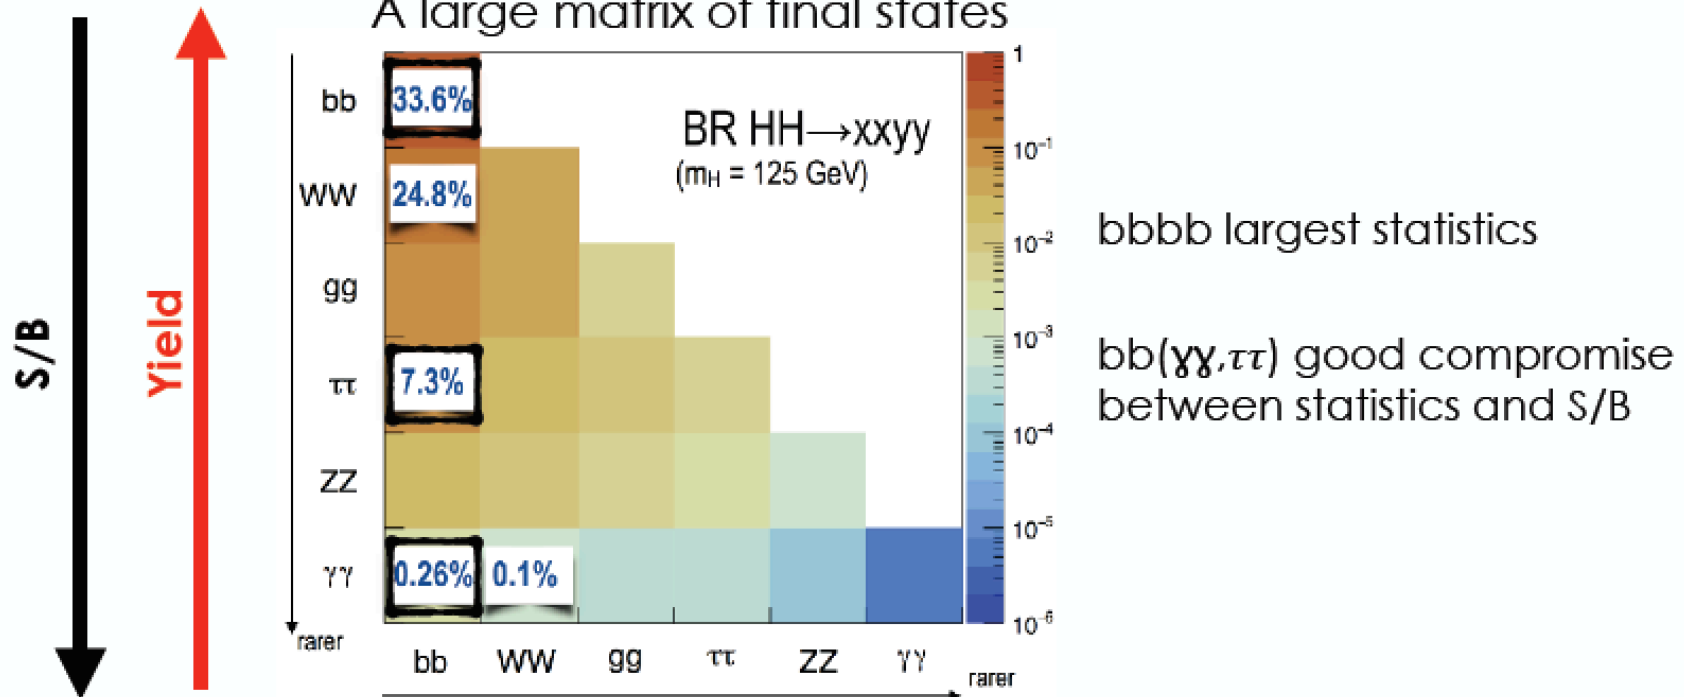

Main probe for trilinear Higgs coupling  $\lambda_{HHH}$ . Diagrams interfere destructively in SM

sensitive to possible BSM contributions

A large matrix of final states

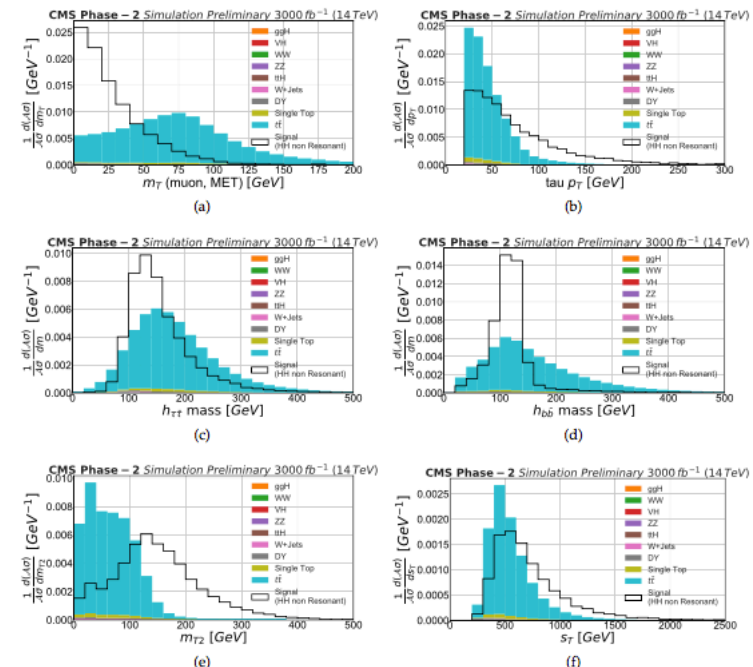

# Advanced Analysis Techniques

arXiv:1902.00134

M. Bengala, R. Santo, G. Strong

- 1) Select **HH** events in different categories:  $\mu\tau_h bb$ ,  $e\tau_h bb$ , and  $\tau_h\tau_h bb$
- 2) Train classifier consisting of an ensemble of **deep neural networks (DNN)** on half of MC data to classify signal and background events using final-state features
- 3) Apply classifier to other half of MC data
- 4) Treat the classifier **prediction** as a summary statistic of the data and infer the signal strength via a combined hypothesis test for each decay-channel category
- 5) 52 pre-processed features are used to define each event

# Looking forward: exclusive processes

CERN-LHC-2014-021

- Precision Proton Spectrometer (PPS) aims at measuring the surviving **scattered protons** on both sides of CMS in standard running conditions
- **Precise timing and tracking** detectors
- PPS data combined with those of central detector
- Collected  $\sim 100/\text{fb}$  of data in 2016-2018

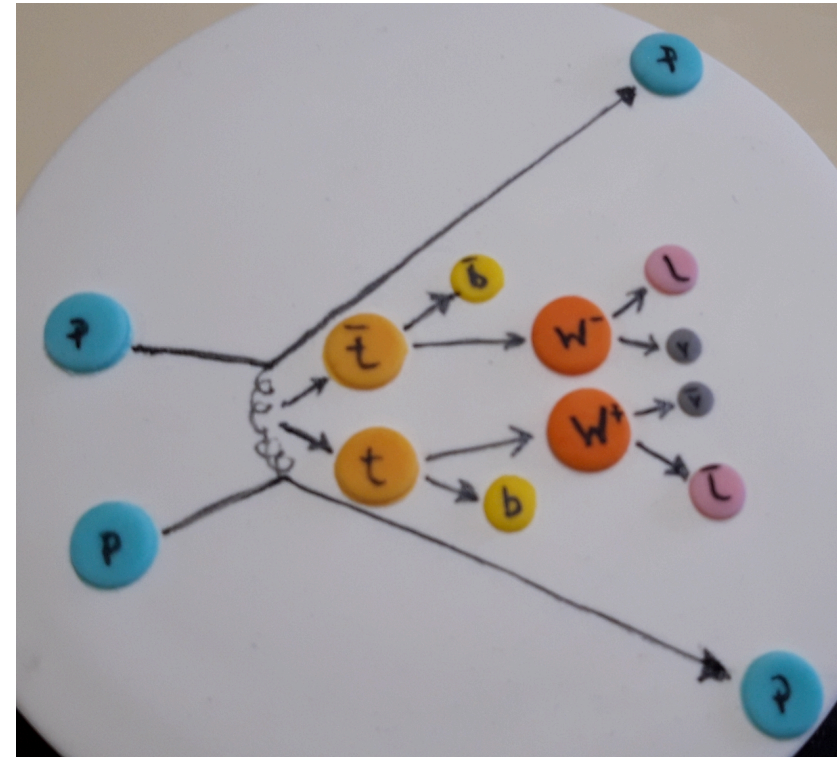

# Exclusive production

arXiv:1803.04496

B. Lopes et al.

- **Central Exclusive Production**
  - photon-photon collisions
  - gluon-gluon fusion in color singlet,  $J^{PC}=0^+$
- **High-mass system in central detector, together with very forward protons in PPS**
  - momentum balance between central system and forward protons, provides strong kinematical constraints
  - Mass of central system measured by momentum loss of the two leading protons
- **Couplings in SM are small and deviations from predictions may hint for NP**
- **Sensitive anomalous couplings** ( $\gamma\gamma WW$ ,  $\gamma\gamma ZZ$ ,  $\gamma\gamma\gamma\gamma$ , and  $\gamma\gamma tt$ )

- **Search for new BSM resonances**

# If you want to know more...

## COURSE ON PHYSICS AT THE LHC

Lisbon, PORTUGAL  
02 MARCH - 26 JUNE 2020

REGISTER NOW

## If you are interested, please register!

# Thank you!

- Large data sample available:  $\sim 150\text{fb}^{-1}$
- Several interesting analysis topics available (Top, Dark Matter, Higgs, Exclusive states, etc.)
- Strong involvement of students (several Master and PhD theses)

⇒ Join! Your contribution will make the difference!
