

SciNeGHE 2014

Thursday, 5 June 2014

Contributed Talks - Auditorium (09:00 - 10:40)

-Conveners: Javier RICO

time	[id] title	presenter
09:00	[40] The GAMMA-400 gamma-ray telescope characteristics. Angular resolution and electrons/protons separation.	LEONOV, Alexey
09:20	[43] The Gamma-ray Milky Way above 10 GeV: Distinguishing Sources from Diffuse Emission	OWEN, Ellis
09:40	[44] High-energy particle acceleration and gamma-ray emission in colliding-wind binaries	REITBERGER, Klaus
10:00	[45] Photon search at the Pierre Auger Observatory	LU, Lu
10:20	[47] Search for extended gamma-ray halos around AGN with VERITAS	PUESCHEL, Elisa

Contributed Talks - Auditorium (11:10 - 12:30)

-Conveners: Daniel MAZIN

time	[id] title	presenter
11:10	[48] Gamma-ray Astrophysics and GRB studies with AGILE	LONGO, Francesco
11:30	[50] Hints for an axion-like particles from PKS 1222+216?	GALANTI, Giorgio
11:50	[46] A statistical approach to the study of blazar jet emission	BIASUZZI, Barbara

Friday, 6 June 2014

Contributed Talks: Contributed Talks - Auditorium (09:00 - 09:40)

-Conveners: Nicola GIGLIETTO

time	[id] title	presenter
09:00	[38] Solar panels as cosmic ray detectors	STELLA, Carlo
09:20	[39] Discrimination of gamma/proton primaries using the EAS muon content for IACTs	CONCEIÇÃO, Ruben
