

IDPASC/LIP – PhD Workshop

Final notes ...

Mário Pimenta
Remote ..., June 2020

Many Thanks !!!

- To the students
- To the key-note speakers
- To our external committee
- To all the participants
- To the organizing committee
(in particular, to Ricardo)

It was a great meeting

25 PhD students + 7 Keynote talks (5 Master students' posters):

- 7 Experimental particle physics
- 3 Astroparticles
- 5 Theory/Phenomenology
- 3 Astrophysics
- 4 Cosmology
- 3 Technology

74 participants about 51 ± 6 per session

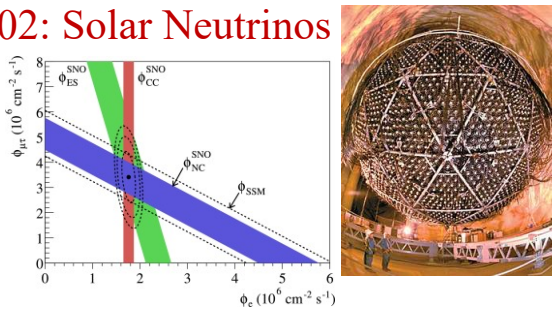

very good presentations by motivated PhD students and keeping the time!

Nevertheless, I missed the discussion in the corridors, the social interactions, the dinners ...

The XXI is just beginning !!!

Just a few examples
sorry ...

2002: Solar Neutrinos

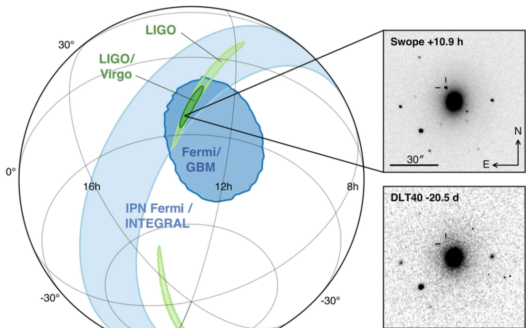

2012: Higgs

2016: GW

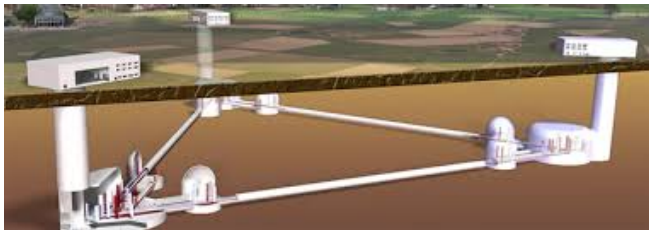

2017: Multimessengers

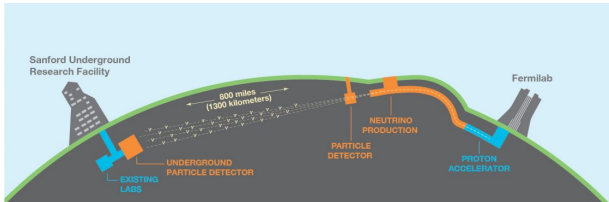

HL-LHC and then hopefully FCC

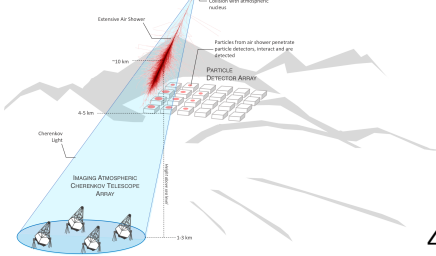

Einstein Telescope and then LISA

DUNE and many other neutrino experiments

CTA, LHAASO, SWGO

Many opportunities and challenges waiting for you !

Meet you all (in person !) in one Year
