Competence Center - Big Data 8th Informal Meeting 5th April 2021

Suggested talking points

- Current DS/ML/AI interests and curiosity
- Format and scope of the future of future regular Big Data informal meetings
 - Journal club, seminars, just discussion, etc
 - What do you want out of the Competence Centre
- Interest and demand for topical tutorials for LIP researchers
 - ML basics, Graph Neural Nets, etc

We are not pre-allocating any time for any of these, they are discussion starters

My own current Big Data interests

- Anomaly detection as a generic new physics discriminant
 - Auto-Encoders, Deep-SVDD, etc
- ML on low level detector data
 - CNN, GNN, Transformers, etc
- ML for BSM model validation
 - Oversampling techniques, Generative Models

Format and scope of these meetings

- Monthly?
- Keeping the journal club?
- Seminars?
- ML brainstorming and Q&A?

Intest and demand for topical tutorials for LIP researchers

- I would like to learn more about Graph Neural Networks
- I can help with many other topics in ML
